

Pityas Teaghes

Seattle, WA | pityasteaghes04@outlook.com | www.linkedin.com/in/pityasteaghes | <https://github.com/pityasteaghes04>

EDUCATION:

University of Washington Bothell — Bothell, WA

Bachelor of Arts in Data Visualization | GPA: 3.76 | Expected: May 2027

Core Proficiencies: Python (Advanced), SQL, C++, Predictive Modeling, ETL Pipelines, System Architecture, Linux, Git.

Technical Projects:

SolarAnywhere | *Python, Google Maps API, Visual Crossing API* |

March 2025 – July 2026

- **Geospatial & Hardware Mapping:** Integrated Google Maps and Visual Crossing APIs to target specific landmarks like the Space Needle and calculate exact battery charging specs (Wh) for different phone models
- **Probabilistic & Reliability Analysis:** Analyzed dynamic daily solar radiation (W/m^2) and built ICDF models to figure out exact phone charging success rates under different weather conditions.
- **Global Stress Testing & Resilience:** Tested model performance under **low-bandwidth** and **high-irradiance conditions**, adding **fallback logic** so the tool stays reliable even during data outages.

Logistics & Shipment Optimization | *Excel, Descriptive Statistics, Regression* |

September 2024 - December 2024

- **Large-Scale Data Processing:** Cleaned and structured a **dataset of 50,000+** shipment transactions in **Excel**, applying descriptive statistics to evaluate core supply chain distributions and delivery transit times
- **Statistical & Predictive Modeling:** Conducted **regression analyses** and **t-tests** to evaluate bottleneck variables, disproving shipment weight as a primary predictor of **transit speed** ($p > 0.05$)
- **Data Visualization:** Developed **comprehensive charts** and summaries to communicate findings, directly **improving route planning** and tightening baseline delivery forecasts.

WORK EXPERIENCE:

EdgeConneX | Seattle, WA Security Operations Center (SOC) Operator |

March 2026 – Present

- Manage high-level security systems and emergency response protocols to ensure data center uptime nationally and physical site safety.

Securitas Security Service / Amazon | Seattle, WA Building Security Officer |

December 2023 - July 2024

- Identified and resolved immediate security threats to maintain operational continuity and site safety within a high-traffic corporate environment.
